

We are looking for a process engineer to join us soon at our location in Verna - Goa:

Process Engineer (m/f/d)

Your tasks:

- Continuous optimization of production processes and plant technology in cooperation with the departments
- Consistent methodical and technological orientation of the site towards maximum productivity and quality
- Development and testing of new no-line measuring procedures
- Preparation and execution of trials (production & technology) according to specified orders as well as for the optimization of products and processes within the framework of project processing and the continuous improvement process
- Testing and evaluating physical textile parameters and initiating measures in the event of deviations from the specified values, including independently developing solutions to problems and deriving necessary measures
- Recording and evaluating tests and presenting the results in report form and as a basis for presentations
- Compilation and analysis of test results in the required form
- Supporting production & technology in solving daily tasks
- Assisting with key tasks in production and resolving complaints
- Taking on special tasks in coordination with the supervisor
- Ensuring a safety-oriented and prevention-oriented way of working
- Active participation through regular safety briefings at the workplaces, conducting safety audits and observing the "Occupational safety for managers" leaflet

Our expectations:

- Completed studies in plastics/ filament industry or process engineering or completed relevant training as a master craftsman or physics laboratory technician
- 10-15 years of experience in plastics/filament industry or process engineering an advantage
- Good knowledge of English and Hindi
- Skilled handling of MS Office and Tally

We offer:

- A challenging, dynamic job in a modern, internationally active company
- A versatile and varied job, combined with a high degree of independence and responsibility in a committed team
- A performance-related salary

Perlon® – The Filament Company
